

**FOR IMMEDIATE RELEASE**

**EASTER SEALS WEST KENTUCKY RECEIVES IN-KIND SUPPORT FROM ULRICH MEDICAL CONCEPTS**

PADUCAH, KY, March 25, 2013 – Ulrich Medical Concepts (UMC) is donating their software development services to create a tailored electronic health record (EHR) system for The Lily Pad at Easter Seals West Kentucky. The donation will be used to track medical procedures, therapies, medications and more for each child who enrolls at The Lily Pad in the fall of 2013.

Easter Seals West Kentucky is in the beginning stages of implementing a Prescribed Pediatric Extended Care (PPEC) program, called The Lily Pad. The program will provide enhanced childcare to Western Kentucky families with children facing complex medical issues. Services will include daily skilled nursing, customized service plans, therapeutic and developmental interventions, as well as family support resources. Construction of The Lily Pad should begin in May 2013.

“We need specialized medical tracking software for our nursing staff to track the health status of the children The Lily Pad will serve,” said Danny Carroll, president and CEO of Easter Seals West Kentucky. “Many of the children will have complex medical issues, which make them unable to attend a regular daycare, so managing crucial medical data is imperative.”

“We are proud to have this opportunity to support the Easter Seals and The Lily Pad Program,” said Sandra Ulrich, president of UMC. “This is a wonderful cause that will enhance many lives in our community.”

**About Easter Seals West Kentucky**

Easter Seals West Kentucky represents nearly half a century of helping people with physical and cognitive impairments to gain greater independence by providing quality services. Begun in 1954 through the merger of the McCracken County Cerebral Palsy Organization and the Crippled Children's Clinic, Easter Seals West Kentucky serves 19 counties in western Kentucky, plus areas in southern Illinois and southeastern Missouri.

**About Ulrich Medical Concepts**

Ulrich Medical Concepts (UMC) is a software development company specializing in electronic health records (EHR) in the ambulatory, medical billing and correctional fields. For over 14 years, UMC's patented flagship product, Team Chart Concept (TCC), has created a complete solution for healthcare information management. Seamlessly integrating EHR with practice management, TCC is customizable to meet the ever-changing needs of medical practices.

UMC has also donated their EHR software to the McCracken County Jail and West Kentucky Community and Technical College.
